Madam, Sir,

Currently a first-year student at the computer engineering school of Montpellier, I am looking for a 4 to 6-month internship starting in July.

My main objective is to participate in the development of computer programs, regardless of the language, and to join a team where I can discover the world of computer development companies. Through this internship, I aim to acquire a first experience in the environment of new technologies and to discover the reality of the company.

I am convinced that this internship will allow me to apply my knowledge and develop my computer skills. I am also very motivated to discover new technologies and to work with a team of passionate professionals.

Given my shortcomings in English, I would like to do my internship abroad in order to improve my language skills. This would also provide an opportunity to promote my school in other countries.

I am available to discuss this further during an interview or a video conference and I am ready to fully invest myself in this internship. Thank you in advance for your attention to my application.

Looking forward to hearing from you, please accept, Madam, Sir, the expression of my distinguished regards.
